

CONFORMAL COATING DIP SYSTEM

Model No. DS102

Conformal coating solutions made easy

Control your process with our precision low volume dip coating system

The DS102 bench-top dip coating system is designed specifically for prototype and small volume dip coating of printed circuit boards (PCBs) in conformal coating.

This compactly designed system offers a range of functions and features, resulting in a system so straightforward, cost effective and easy to use, it makes hand-dipping unnecessary.

Standard Features

- A pneumatically driven control system, affording superior, smoother control to the operator when setting up and during operation
- Compressed air function improves safety with flammable coatings
- System operates completely from a single air inlet
- Multiple horizontal support rods mounted on dipping arm for flexible loading of PCBs
- Removable coating tank and lid for material for flexible processing
- Compatible with nearly all conformal coatings

Facilities

- Compressed air supply only
